High Point Market: Dutailier Unveils Two New AvantGlide Gliders

Saint-Pie, March 21st, 2017 | At High Point Market in April, Dutailier will unveil Charlotte and Austin, its two new gliding recliner chairs from the AvantGlide collection.

Charlotte is a wonderful addition to this collection. With a slightly bohemian style, this chair puts your fast-paced life on pause for a few minutes. Its streamlined curves and lines come together in perfect harmony to create a look that will blend in with the coziest of decors.

Meanwhile, Austin balances geometric angles with a contemporary look. It stands out with bold lines and exotic elegance. Inspired by Texas's arid environment, it will fit into more sober decors—but any moment spent in the Austin glider is a guilty pleasure.

Featuring a refined design, these chairs combine comfort and technology with a swivel base, adjustable headrest and integrated Technogel seat support from Dutailier's exclusive partner. For optimal relaxation, each handcrafted chair can be paired with a matching gliding ottoman.

«The new AvantGlide gliders introduced last spring were such a hit that we had no choice but to expand our offer to meet demand,» said David Fontaine, Executive Vice-President of Dutailier. «Fans of the transitional style will love the Charlotte and Austin gliders and their perfect blend of the traditional and contemporary.»

«Today's consumers want original and stylish products with significant added value. That's our forte. Our partnership with the Italian company Technogel is a good example, as it enables us to offer unique, avant-garde gliders,» added Mr. Fontaine.

New exhibition area

More than 15 AvantGlide gliders will be displayed in Dutailier's new showroom, now located at H-511 Hamilton, on the fifth floor. In this newly renovated 1,600 square-foot exhibition area, visitors can walk through six displays inspired by the latest decor trends

About Dutailier

Dutailier is a leading North American manufacturer of wood gliders and children's furniture. Founded in 1977 in Quebec, this family-run company has 180 employees and manufactures over 40,000 gliders annually in its two Canadian plants.
