## **Skovby launches new line of storage furniture**

This year Skovby launches a brand new line of functional and aesthetic storage furniture – the *SM400 sideboard line*. This line is the latest addition to the Skovby furniture selection. The line consists of 4 sideboards, the SM401, SM402, SM404 and SM405 as well as a display cabinet called SM452. The design is proportioned according to the Golden Ratio.

### **The Golden Ratio**

This year Per Haansbaek has been inspired by the principle of the Golden Ratio for the new Skovby releases. The Golden Ratio is a special calculation, which has been used in Western culture since the ancient Greeks in order to create harmony in design.

### **Passion and experience**

For more than 25 years Per Haansbaek has been the main partner in the creation of many successful Skovby designs. With a passion for equal parts materials, design and functionality, architect Per Haansbaek has developed a long line of Skovby dining room furniture – and he is also the creator behind the SM400 line.

### **SM400 line**

The design of the SM400 line is very harmonious and the sideboards can hang on the wall or stand on a plinth or on legs. The SM452 cabinet is 100 cm wide and exactly 161,8 cm high – following the proportions of the Golden Ratio. The doors of the cabinet are made of clear glass and the SM452 can stand on a plinth or on legs. All furniture in the 400 line is available in different finishes and with different top parts – wood or laminate.
