## BDI Unveils New Version of Popular Serif Height-Adjustable Table

### New Design Features American-Made Solid Wood Tops in Three Finishes

CHANTILLY, VA – October 25, 2024 – BDI is debuting a warm, new iteration of its popular Serif height-adjustable mobile laptop table at the Fall 2024 High Point Furniture Market. Now featuring an American-made, solid wood top available in three stunning finishes—Toasted Oak, Chocolate-Stained Walnut and Natural Walnut—this refined update, designed by BDI's Jeff Bare, will be showcased in BDI's showroom, IHFC Design Center #724.

Consistent with its original design, the Serif table features a smooth pneumatic base that allows effortless height adjustment from 20.5" to 30.25". With a simple push down or lift up, users can easily change the table's height without the need for levers or switches. This intuitive adjustability makes the Serif table perfect for a variety of uses—whether as a laptop stand, side table, or work surface, adapting to today's versatile lifestyles.

The new solid wood tops, an addition to the original powder-coated aluminum design, not only elevate the Serif table's aesthetic but also allow it to blend seamlessly into any home décor environment. Each finish adds a touch of natural warmth and elegance, enhancing Serif's ability to complement any modern living space.

"BDI is committed to merging innovative design with timeless, high-quality materials. The new wood top offers both a tactile and visual experience that enriches the table's versatile and functional design," said Jeff Bare, Director of Product at BDI. "We believe this evolution of Serif will resonate with designers and retailers looking for high-quality craftsmanship and contemporary style that fits any setting."
