Wildwood Introduces over 150 new pieces across lighting, furniture, mirrors, and decorative accessories at Spring 2025 High Point Market

April 2025 - Wildwood introduces its Spring 2025 introductions, featuring over 150 new pieces across lighting, furniture, mirrors, and decorative accessories. This season, Wildwood embraces bold yet sophisticated design, blending organic forms, natural materials, rich finishes, and a modern take on timeless ornamentation.

Showcasing an array of statement-making pieces, the assortment highlights sculptural, fluid lines in striking new lighting, including chandeliers, pendants, sconces, and lamps. Furniture offerings feature substantial, curved silhouettes in accent tables and seating, merging comfort with artistry. Decorative accessories and objects ranging from textured vases and trays to intricately designed candleholders and boxes, add functional flare to any space.

This season's designs reflect an evolving color palette, where warm, earthy tones take center stage with a rainbow of browns dominating, subtly shifting away from cool grays. Black remains relevant in a more understated way and thick stripes, reminiscent of animal prints, lend a modern edge. Teal makes a refined comeback, appearing in sophisticated accent pieces that add depth and versatility. A range of materiality enhances the collection's tactile richness, where wood, metal, brass, ceramic, glass, marble, hair on hide, rattan and stone blend harmoniously.

Wildwood's Spring 2025 collection redefines classic elegance with a fresh, contemporary twist, where each piece is designed to bring character, warmth and a dynamic yet timeless aesthetic.
